MEMORANDUM FOR: Chief, Defensive Systems Division, OSI

ATTENTION: [REDACTED] Air Defense Branch 25X1A

THROUGH: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, Photo Intelligence Division, CIA

SUBJECT: Possible SA-2 SAM Site Under Construction Near
Barinorusumu, China

REFERENCES: (a) Requirement C-SI-4-82,074
(b) CIA/PID Project C 1850-64

1. This memorandum is in response to your requirement dated 2 December 1964 which requests the negation date and stereo prints of the possible SA-2 SAM site newly identified on KEYHOLE Mission [REDACTED] which is located at 44-50-00N 117-14-15E, near Barinorusumu, China. 25X1D

2. This possible SA-2 SAM site can be negated on good quality photography from KEYHOLE Mission [REDACTED] Succeeding missions over the area which might provide a later negation date were cloud covered. Stereo-
scopic coverage of this possible site was not obtained on KEYHOLE Mission [REDACTED] hence, only one enlarged print (20x) is being forwarded for your retention. 25X1D

25X1A

3. The photo analyst on this project is [REDACTED] who may be contacted on extension 2078 should you have any further questions concerning this project.

4. This project is considered to be [REDACTED]

Enclosures:

One (1) enlarged print (20x),

MEMORANDUM FOR: Chief, Manufacturing and Services Division, ORR

ATTENTION : [REDACTED] 25X1A

THROUGH : Chief, Requirements Branch, Reconnaissance Group, CGS

FROM : Chief, Photographic Intelligence Division, CIA

SUBJECT : Ta'tung Locomotive Plant

REFERENCES : (1) ORR Requirement No. C-RR4-81,985
(2) CIA/PID Project No. C-1752/64

1. This memorandum is in response to the referenced requirement which asks for an analysis of a reported locomotive plant in Ta'tung, Communist China.

2. A search of the area around Ta'tung revealed a heavy industrial facility (CIA/PID/IB-P-1499/64) southwest of the city at coordinates 40°04'20"N - 113°14'40"E.

The presence of tracks leading from the final assembly hall/sub-assembly building, and the general size and composition of the plant suggested heavy fabrication of a type associated with the production of locomotives.

However, the lack of large scale photography precluded an exact identification and analysis of the facility. The plant appeared to be complete, and contained supplies of coal and other materials. Except for the presence of two rail cars, no smoke or other activity was observed.

3. The photo analyst assigned to this project was [REDACTED] 25X1A who may be contacted on extension 2547 should you have any questions regarding this project. This memorandum and enclosed graphic complete this requirement.
